Neurologist and Sleep Specialist Comes to Greene County

BEAVERCREEK, OH – A new physician has brought her expertise in neurology and sleep medicine to Greene County. Michelle Noel, D.O., is now seeing patients at two Greene Memorial Hospital facilities in Beavercreek.

Dr. Noel practices general neurology at her office at the GMH Beavercreek HealthPark at 3359 Kemp Road, Suite 230. In addition, as the new medical director of the GMH Sleep Center, she also treats patients and conducts sleep studies at the Beaver View Health Care Center at 3095 Dayton-Xenia Road.

“As a neurologist who fellowship-trained in sleep medicine and has experience in pulmonary critical care, Dr. Noel’s multidisciplinary background will be a great asset to us,” said Rich Cohen, GMH Sleep Center director.

Dr. Noel is not new to the Dayton area. Prior to completing her fellowship at Wayne State University, she was chief resident at Grandview Medical Center, where she also interned.

“I am excited to return to the area,” said Dr. Noel, a graduate of Pikeville College of Osteopathic Medicine in Kentucky. “With my practice at the HealthPark and my work at the GMH Sleep Center, I hope to have an impact on the lives and greater health of the community.”

As an avid runner and a proponent of eating right, Dr. Noel lives a healthy lifestyle that she hopes serves as a model for her patients. “I try to live the life that I ask my patients to live,” said Dr. Noel of her commitment to healthy living.

For more information about Dr. Noel’s practice at the Beavercreek HealthPark please call (937) 439-6186. For more information about the GMH Sleep Center call (937) 458-4010. Those interested in becoming a patient should ask their physician for a referral.
